### 1. Examinations and tests

The type examination of the telescopic landing door PRL C150-015 T2 existed from assessing the technical file and witnessing the laboratory test. The test was executed on February 6, 2009 at FIRES, Slovakia. All results for fire resistance are described in FIRES report no. FIRES-FR-011-09-AUNE. Liftinstituut recognizes the test and results. Report FIRES-FR-011-09-AUNE is part of this examination (see annex 2).

### 2. Results

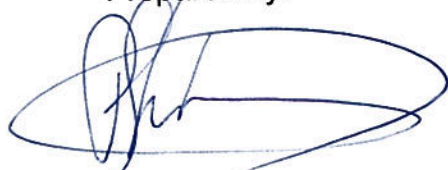

After the final test the fire resistance results of the lift landing door were ranked in accordance with the requirements (classification) of the standard EN 81-58. See report FIRES-FR-011-09-AUNE Appendix No. 1 for field of direct application of test results.

### 3. Conclusions

Based upon the results of the type-examination, Liftinstituut B.V. issues a certificate for the fire resistance of the telescopic landing door Prolift PRL C150-015 T2. The type-examination certificate is only valid for products which are in conformity with the same specifications as the type-certified product. Products deviating of these specifications need additional examination by Liftinstituut in order to determine whether a new type-examination certificate is necessary. Additional examination shall be requested by the certificate holder.

The type examination certificate is issued based on the requirements that are valid at the date of issue. The manufacturer shall request from Liftinstituut B.V. the review of the validity of the EC-type examination certificate, taking into account the changes in the requirements or changes in the state of the art of the product, every 5 years.
